PREMIUM OIL SERVICE – AN EXCLUSIVE BENEFIT FOR WORKSHOP PROS

Satisfied customers are the prerequisite for the continued existence of any workshop. Service, expertise, reliability and quality are of the utmost importance when solving problems. The ROWE PREMIUM OIL SERVICE for fuel and oil circuits offers your business and your customers a tangible and noticeable added value and is setting new standards in service and performance compared to conventional oil change offerings.

What is the ROWE PREMIUM OIL SERVICE?

A workshop service that extends beyond the product itself. Only in combination with our high-quality Made in Germany lubricants, we deliver exclusively to ROWE workshops highly concentrated additives for oil servicing use. This requires no additional effort on the part of our partner workshops, but does generate additional sales potential because the ROWE PREMIUM ÖL SERVICE offers true added value to all workshop customers. The premium products for fuel and oil circuits improve the performance, efficiency and service life of the engine and, thanks to their enormous effectiveness, also increase customer satisfaction and ultimately loyalty to the ROWE partner workshops.

Why are our PREMIUM additives only used in workshops?

Because they have been specially developed for our partner workshops and represent an especially high-quality additive package. When used correctly, our PREMIUM products for engines and transmissions are characterized by their impressive cleaning performance that no end-customer additive can achieve. That's why the unique formulation belongs in the hands of workshop professionals and trained staff only and, when used properly, dissolves even stubborn deposits in the combustion chamber and on valves and injectors. Its reliable and especially deep penetrating action ensures maximum cleanliness, improved lubricating performance and optimal wear protection in the oil circuit. The exclusive workshop additives from ROWE are indispensable for anyone who would like to offer their customers noticeably more performance and reliability.

Retained value, driving feel, cost savings – an investment that pays off!

OUR ADDITIVES ...

...will impress you with their exceptionally strong cleaning and preservation effects.

...contribute to the longevity of the engine.

...maintain engine performance (HP and torque).

...increase fuel consumption efficiency.

OPTIMIZED PERFORMANCE THANKS TO ROWE PREMIUM OIL SERVICE

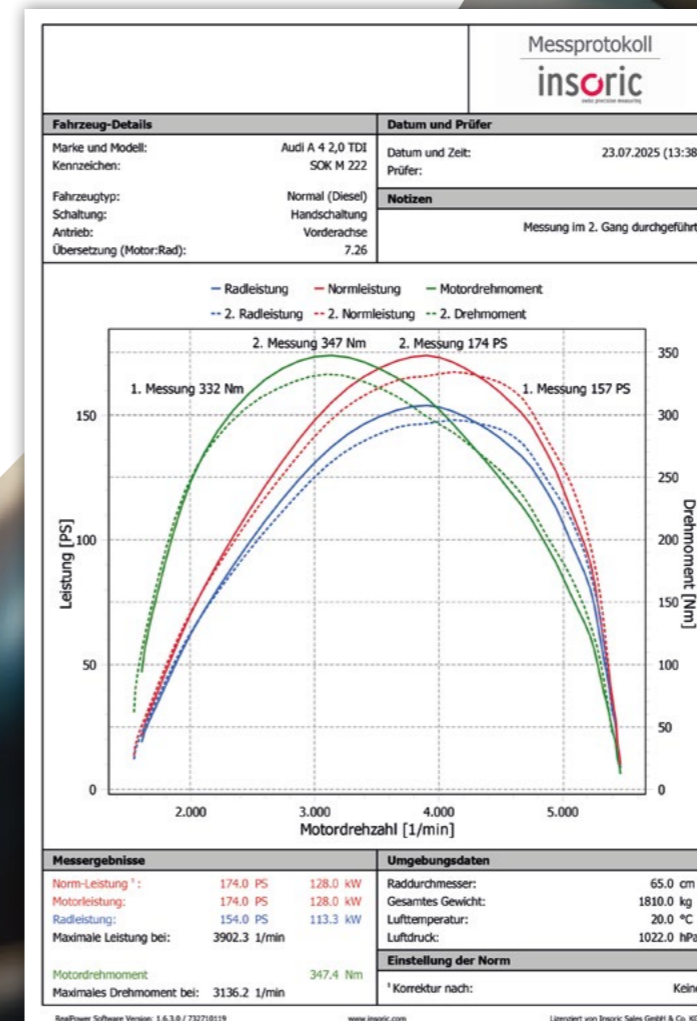

The first measurement was taken on July 22 (dashed line). 300 ml of our **HIGHTEC PREMIUM CLEANER DIESEL** (Art.-No.: 23063) was then added to the fuel tank and the tank filled up completely.

After a driving distance of 400 km, mainly on the autobahn at a speed of around 130 km/h, the second measurement (solid line) was taken on July 23.

The results are impressive:

- Performance increase of around 5.5 %
- Fuel saving of approx. 4.5 – 5 %

An oil change using our **HIGHTEC ENGINE CLEANER** (Art.-No.: 23021) was also performed. This led to an equalization of the compression in all four cylinders.

Example: Audi A4 2.0 TDI

HIGHTEC PREMIUM CLEANER ENGINE (Art.-No.: 23061)

The pro treatment for gasoline and diesel engines.

For professional use in workshops only. Not available in retail.

HIGHTEC PREMIUM CLEANER ENGINE is an exclusive high performance additive that is used exclusively in ROWE partner workshops and in combination with our high-quality Made in Germany lubricants. It was specially developed for the requirements of professional users and is powerful, efficient and uncompromisingly effective. Private users cannot access this premium product as true high-performance solutions belong in the hands of specialists. Perfectly tailored to professional maintenance intervals, it delivers a maximum effect with minimum effort.

Maximum cleaning performance – before the oil change

The unique formula of **HIGHTEC PREMIUM CLEANER ENGINE** unfolds its full effect directly before the oil change in gasoline and diesel engines. Easy to use with no additional effort required, it ensures a thorough cleaning of the entire oil circuit – fast, reliable and efficient.

Deep cleaning for the engine

Gumming, deposits and oil residues don't stand a chance.

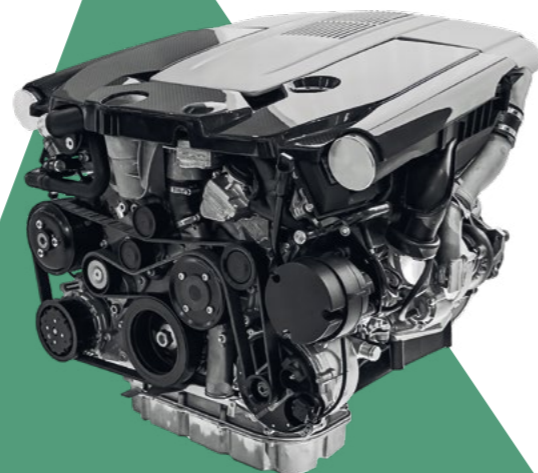

- Thoroughly cleans the piston rings, hydraulic tappets, valve trains and oil channels and eliminates troublesome residues.
- The result: A noticeably cleaner engine and optimum conditions for new engine oil.

More power, less emissions

Thanks to the intensive cleaning, **HIGHTEC PREMIUM CLEANER ENGINE** improves the compression and ensures all cylinders run evenly. It lowers the oil consumption and reduces emissions, thereby enabling the engine to unfold its full potential.

Efficient & workshop-friendly

Can be incorporated into the everyday workshop tasks with no additional effort. Simply add the additive to the old engine oil before changing the oil. The dissolved residues are fully removed during the oil change – clean, fast, professional.

HIGHTEC PREMIUM CLEANER FUEL (Art.-No.: 23062)

The high performance petrol additive for professionals.

For professional use in workshops only. Not available in retail.

HIGHTEC PREMIUM CLEANER FUEL is an exclusive high performance additive that is used exclusively in ROWE partner workshops and in combination with our high-quality Made in Germany lubricants. It combines state-of-the-art cleaning technology with performance-enhancing effects. Private users cannot access this premium product as true high-performance solutions belong in the hands of specialists. Perfectly tailored to professional maintenance intervals, it delivers a maximum effect with minimum effort.

Maximum effect during maintenance and servicing

Fast and lasting action – ideal for use during inspections and maintenance work. A single use is sufficient to effectively dissolve deep-seated deposits in fuel systems.

Intensive cleaning of inlet valves, injectors & combustion chambers

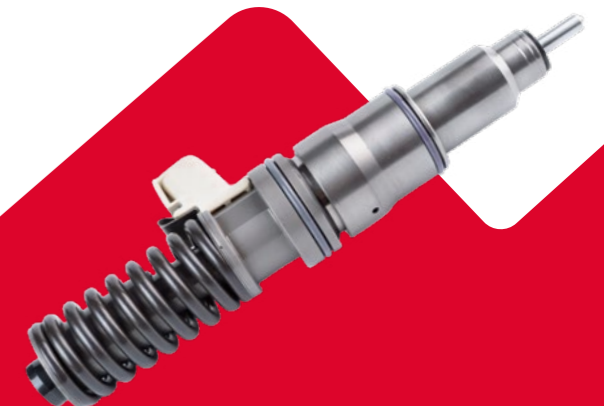

Removes stubborn residues on inlet valves, injectors, pistons and in combustion chambers resulting in clean components, improved fuel nebulization and an optimized combustion process you can feel from the first drive.

Restoration of engine performance & efficiency

Ensures significantly improved combustion, restores the original engine performance, lowers the fuel consumption, and improves the exhaust characteristics. Ideal in cases of loss of power, increased consumption or rough engine operation.

Lasting protection for the entire fuel system

Provides lasting protection against corrosion, deposits and wear throughout the entire fuel system – including the high pressure pump, injectors and catalytic converter. Noticeably extends the service life of important components.

HIGHTEC PREMIUM CLEANER DIESEL (Art.-No.: 23063)

The professional additive for maximum engine performance.

For professional use in workshops only. Not available in retail.

HIGHTEC PREMIUM CLEANER DIESEL is an exclusive high performance additive that is used exclusively in ROWE partner workshops and in combination with our high-quality Made in Germany lubricants. It combines state-of-the-art cleaning technology with performance-enhancing effects. Private users cannot access this premium product as true high-performance solutions belong in the hands of specialists. Perfectly tailored to professional maintenance intervals, it delivers a maximum effect with minimum effort.

Deep-penetrating clean from the first use

Develops its full power right from the first use. Effectively dissolves and removes even stubborn deposits on injectors, pistons and in the combustion chamber. The result? Noticeably improved engine running characteristics and an immediate performance increase.

Precision, protection and longevity for modern diesel systems

Offers uncompromising care for modern high-pressure injection systems, ensures a precise fuel atomization, and sustainably protects all fuel-conveying components. The additive extends the service life of the systems and maintains the full efficiency of the engine.

Efficiency meets environmental awareness

Thanks to the optimized combustion, the additive not only lowers the fuel consumption but also the emissions - without compromising performance. Even vehicles with diesel particle filters (DPF) benefit from the cleaning and protective effect.

HIGHTEC PREMIUM CLEANER TRANSMISSION (Art.-No.: 23064)

The pro additive for maximum transmission performance – exclusively in the workshop.

For professional use in workshops only. Not available in retail.

HIGHTEC PREMIUM CLEANER TRANSMISSION is an exclusive high performance additive that is used exclusively in ROWE partner workshops and in combination with our high-quality Made in Germany lubricants. This specialized product for petrol engines deep cleans and optimizes the performance of automatic transmissions – well beyond what conventional additives can achieve. Private users cannot access this premium product as true high-performance solutions belong in the hands of specialists. Perfectly tailored to professional maintenance intervals, it delivers a maximum effect with minimum effort.

Deep cleaning of the entire automatic transmission

Removes even stubborn deposits and operational dirt for a noticeably clean and smooth shifting behavior.

Restoration of shifting quality

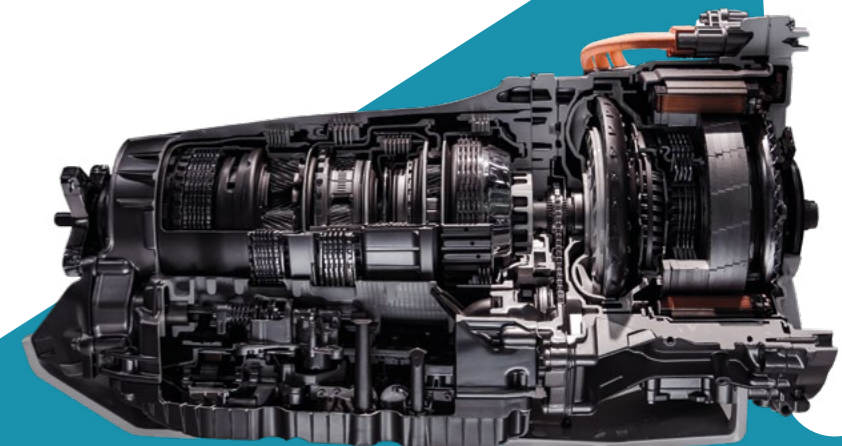

Eliminates typical problems such as jolting, hesitant starts or imprecise shifting. Noticeably and sustainably optimizes the transmission function from the first use.

Lasting protection from corrosion & wear

Provides lasting protection for sensitive components against deposits, corrosion and mechanical wear – also ideal for older vehicles with increased maintenance requirements.

Universal compatibility

Fully compatible with all commonly used transmission oils and automatic transmission types. It is risk-free and uncomplicated to use – exclusively by trained specialists.
