

HIGHTEC LEAD SUBSTITUTE / BLEIERSATZ

Fuel additive. Protection against wear to valve seats and valves when changing from leaded to unleaded petrol.

Description

HIGHTEC LEAD SUBSTITUTE / BLEIERSATZ protects old engines without hardened valve seats when using unleaded petrol.

Application

For protecting engines that have been designed to operate with leaded petrol and are not equipped with hardened valve seats. These engines can be operated with an environmentally friendly, unleaded petrol by simply adding HIGHTEC LEAD SUBSTITUTE / BLEIERSATZ.

Advantages

- Wear protection for valve seats
- Valve noise reduction
- Ease of use in dosing containers

Notes

- Dosing
- 1:1000
-
- Example
- 20 ml is sufficient for 20 litres of fuel
- 50 ml is sufficient for 50 litres of fuel
