HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS

System cleaner for direct-injection petrol engines. Also suitable for carburettor and intake manifold injection engines. Fuel additive. Cleans and protects the entire fuel system from the tank to the combustion chamber.

Description

HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS was specially developed to clean the entire fuel system of vehicles with modern, direct-injection petrol engines. HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS cleans all components that come into contact with petrol - from the tank, via the lines up to the sensitive injectors and even the combustion chamber with valves and spark plug. The cleaner makes it possible to remove deposits and therefore allows the fuel system to function more efficiently. Undesirable early injection (LSPI) is also prevented thanks to the cleaner injection process. In addition, the cleaning effect of HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS provides protection against expensive repairs, ensures optimum power output and results in lower emissions. This means fuel consumption can also be reduced. Damaging corrosion is avoided and engine operation can be significantly improved over the entire rpm range in combination with smoother idling. Increased wear due to a contaminated fuel system is reliably prevented.

Application

HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS is added to the fuel and then mixes itself with the petrol. The cleaner keeps the engine clean and burns without pollutants, which can help contribute to optimum fuel-saving operation. Use recommended for cold-starting problems, rough engine running or poor exhaust emission values. HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS can also be used as a precautionary measure to avoid damage or contamination.

ROWE recommendations

- Opel/Vauxhall 95 599 923

Advantages

- Dissolves deposits and residues
- Can prevent wear
- Can improve engine performance
- Self-mixing
- Increases operating reliability
- Ensures a uniform combustion process and smoother engine running
- Can optimise emissions and reduce consumption
- Protects high-precision fuel injectors
- Can prevent corrosion
- Also suitable for E5 and E10 fuels
- Can stop undesirable early injection (LSPI)
- Also suitable for petrol engines (with and without turbocharger) with catalytic converter

Recommendation

- HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS is also recommended for all Opel/Vauxhall petrol vehicles where regular use of an injection system cleaner is specified. - HIGHTEC INJECTION CLEANER PLUS / EINSPRITZSYSTEMREINIGER PLUS can also be used in carburettor and intake manifold injection engines.

Notes

- Not suitable for diesel vehicles.
- Store in a cool, dry place away from light.
-
- Dosage
- Add one can to a tank filling (sufficient for a tank capacity of approx. 60 l). Do not drive the tank empty.
