

HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER

Cleaning agent for periodic use in SCR catalyst systems (Selective Catalytic Reduction).

Description

HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER reliably removes crystalline deposits from urea dosing systems and SCR catalytic converters, which can arise when operating with urea solution AUS 32 (e.g. AdBlue®). This can protect against malfunctions and loss of performance due to emergency operation.

Application

Pour the required amount into the canister/bottle containing the urea solution. Please refer to the mixing table for the required quantity. Then put the mixture (HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER and urea solution) into the vehicle's tank. HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER is intended for regular and permanent use.

Advantages

- Removes deposits of the urea solution AUS 32 (e.g. AdBlue®) which can impair the performance of the system
- Counteracts crystal formation in urea dosing systems and SCR catalysts
- Protects against new crystal formation with continuous use
- Simple application
- Prevents performance degradation caused by crystal deposits
- Can prevent costly repairs
- Trouble-free urea systems are a prerequisite for the smooth operation of the vehicle
- Can prevent emergency running caused by malfunction of the urea system
- Reduces the foaming of the urea solution

Recommendation

Dosage: 1:400 1 liter HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER is sufficient for 400 liters of urea liquid. Please refer to the mixing table for further mixtures. The specified dosage should not be exceeded.

Notes

- Compressed air-assisted urea injections can lead to increased foam formation.
- * Third-party trademark

Mixing table

HIGHTEC SCR SYSTEM CLEANER / SCR SYSTEMREINIGER	Urea solution AUS 32
25 ml	10 l
50 ml	20 l
100 ml	40 l
250 ml	100 l
