

HIGHTEC PREMIUM CLEANER TRANSMISSION

The professional additive for maximum transmission performance. For professional use in workshops only.

Description

HIGHTEC PREMIUM CLEANER TRANSMISSION is an exclusive, high-performance additive used exclusively in ROWE partner workshops and in combination with our high-quality "100% Made in Germany" lubricants. This specialized product provides deep cleaning and performance optimization for automatic transmissions—far beyond what conventional additives can achieve. Perfectly tailored to professional maintenance intervals, it delivers maximum effectiveness with minimal effort. It resolves typical issues such as jerking, delayed acceleration, or imprecise shifting. Transmission performance is sustainably optimized—noticeable from the very first use.

Application

This product is to be used exclusively by a professional repair shop. Use 40 ml of additive per 1 L of transmission fluid.

Advantages

- Deep cleaning of the entire automatic transmission
- Restoration of shifting performance
- Long-term protection against corrosion and wear
- Universal compatibility
- Also suitable for CVT and DSG transmissions

Recommendation

Recommended for use with every transmission service.
