

HIGHTEC MULTI LUBE SPRAY

Description

HIGHTEC MULTI LUBE SPRAY contains a versatile active ingredient formula with corrosion-inhibiting, rust-dissolving and water-displacing properties. Provides a pronounced lubricating effect and supports the reliable functioning of mechanical components.

Electrical contacts benefit from improved conductivity, while dirt and stubborn oil and grease residues are effectively removed. Moving components remain permanently smooth-running.

Application

Shake can thoroughly before use. Spray evenly onto the surface or component from a distance of 15-20 cm. If parts are stuck or squeaky, allow a short exposure time, then operate the part to distribute the lubricant. Remove excess product with a clean cloth. Fold-out spray tube ensures precise spraying and dosing.

Advantages

- Excellent creeping properties
- High corrosion protection
- Reduces friction and wear
- Silicone-free
- Maintains the mobility of moving parts
- Neutral towards plastics, paints, metal and wood
- Wide range of applications
