

HIGHTEC ATF 8000

Multi-functional Automatic Transmission Fluid (ATF) of the DEXRON IIIIG generation.

Description

HIGHTEC ATF 8000 is an Automatic Transmission Fluid (ATF) of the DEXRON IIIIG generation. Its exceptional performance capacity is achieved through the interaction of selected HC synthetic base oils and special additives. For use in automatic transmissions, steering systems and hydraulics in passenger cars, commercial vehicles and construction machinery.

Application

HIGHTEC ATF 8000 has been developed specifically to ensure good cold properties and friction coefficient stability. It is used in a variety of units according to the manufacturer's specification. It is thus used in manual and automatic transmissions, power steering systems, power-shift clutches as well as in power transmission fluid in many hydraulic applications.
