Our additives

- / Impress with exceptionally powerful cleaning and preservative effects
- / Contribute to the engine's longevity
- / Maintain engine performance (PS and torque)

Preserving value, driving pleasure, cost savings – an investment that pays off!

What are additives?

Additives play a key role in cleaning and maintaining the engine. In short, they fulfil three functions: cleaning, protecting and maintaining. Of course, additives are no substitute for proper maintenance, but they do have a significant impact on ensuring your vehicle runs cleanly and safely. When used correctly, additives improve the performance, efficiency and service life of your vehicle – whether it is a used or new car.

Why additives?

Cleaning additives are crucial because modern engines operate under extreme loads and even the smallest deposits can have a massive impact on performance, efficiency and service life. ROWE's high-performance additives not only ensure extremely effective cleaning of the engine's internal components, but also perfectly complement our high-quality lubricants – for clean systems, optimum efficiency and maximum service life.

Why choose ROWE additives?

With our additives, we offer one of the highest-quality product ranges on the market, which meets our exacting standards – as demonstrated not least by ROWE RACING's involvement in motorsport. Our products are also capable of meeting the most demanding requirements of modern automotive engineering. Our promise: no marketing, no gimmicks – just results!

The plus for your car

ROWE stands for German engineering excellence and high-quality lubricants that are '100% Made in Germany'. Uncompromising quality, efficiency and reliability are the standards we apply to our fuel, engine and coolant additives too. Our high-performance additives are more than just supplements – they are key technologies for clean engines, long-term performance and smart solutions.

Fuel additives for petrol engines

**Maximum power
and clean
combustion**

Our high-quality petrol additives deliver enhanced performance and efficiency. They clean the entire fuel system, prevent deposits and reliably protect engines against wear. For noticeably better performance and clean operation over the long term.

HIGHTEC FUEL SYSTEM CLEANER ULTRA (Art. No.: 23001)

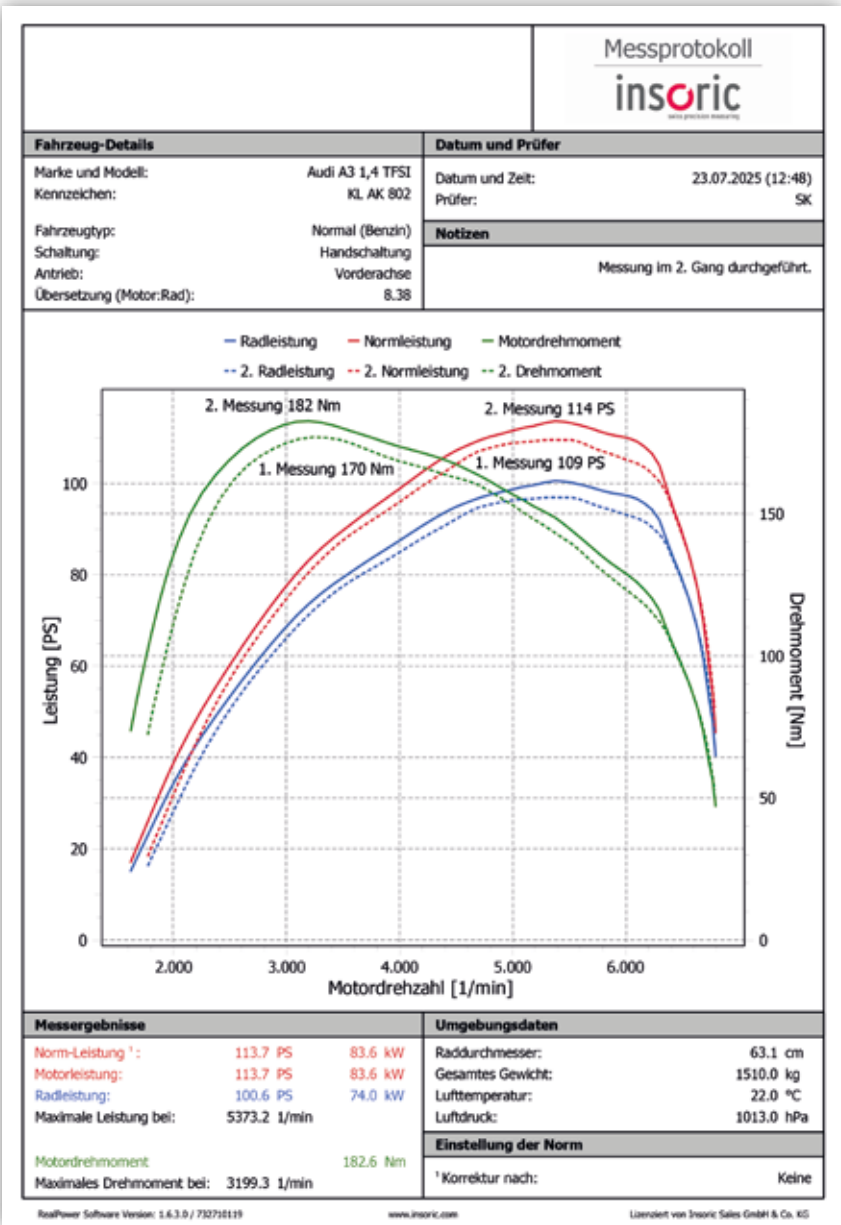

Maximum performance. Minimum build-up.

Unleash the engine's full power and ensure long-lasting cleanliness and protection.

THE BENEFITS AT A GLANCE

- Thorough cleaning of the injectors, the combustion chamber and the entire system
- More power with optimised fuel consumption
- Reliable corrosion protection for E5 to E85
- Gentle cleansing with long-lasting protection against build-up

HIGHTEC INJECTOR CLEANER FUEL (Art.-No.: 23002)

The energy boost for more energy.

Removes stubborn deposits and restores almost the full engine power.

THE BENEFITS AT A GLANCE

- Thorough cleaning of the entire fuel injection system
- More power, optimised fuel consumption
- Safe and compatible with all petrol systems
- Reliable lubrication and noticeably smoother handling

HIGHTEC OCTANE BOOSTER (Art.-No.: 23003)

Maximum power for high-performance engines.

Unleash the engine's full potential and enjoy noticeably better performance.

THE BENEFITS AT A GLANCE

- Increases the fuel's octane rating by up to 5 points
- Optimised start-up and idling performance
- Long-term protection for valves and combustion chambers
- Clean combustion – more efficient engine operation

HIGHTEC HYBRID ADDITIVE (Art.-No.: 23004)

Smart maintenance for hybrid petrol engines.

Ensures maximum efficiency, clean combustion and long-term engine protection.

THE BENEFITS AT A GLANCE

- Optimal cleaning for hybrid vehicles
- Keeps the fuel stable even when the vehicle is used infrequently
- Clean fuel injection system, smooth engine running

HIGHTEC CAT CLEANER (Art.-No.: 23005)

For the most demanding needs and effective protection.

Ensures clean and efficient combustion and prevents harmful residues.

THE BENEFITS AT A GLANCE

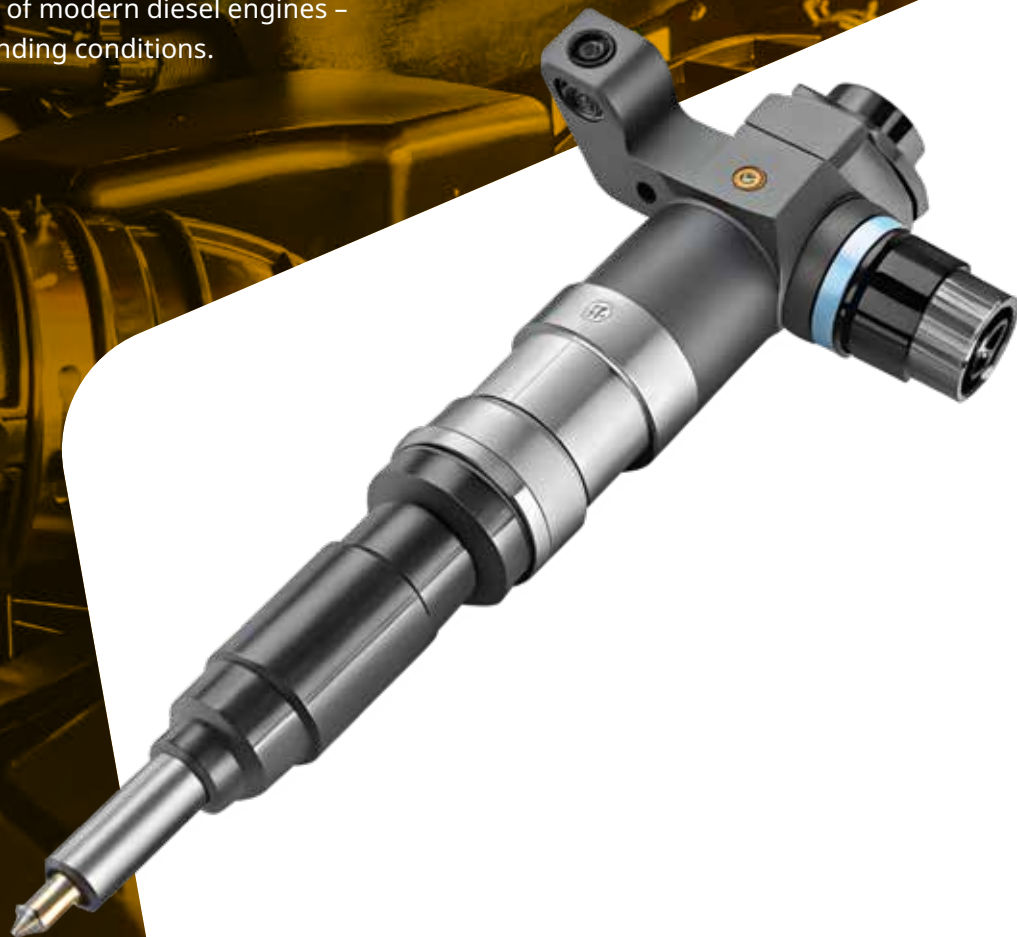

- Protects the catalytic converter and lambda sensor from contamination
- Long-term protection against corrosion and deposits
- The engine starts reliably even after long periods of inactivity

Fuel additives for diesel engines

Reliable in everyday use, efficient in the long run

Our diesel additives are of the highest quality, promote clean injection, increase the cetane number and offer reliable protection against corrosion. They extend the service life of modern diesel engines - even under the most demanding conditions.

HIGHTEC DIESEL SYSTEM CLEANER ULTRA (Art.-No.: 23011)

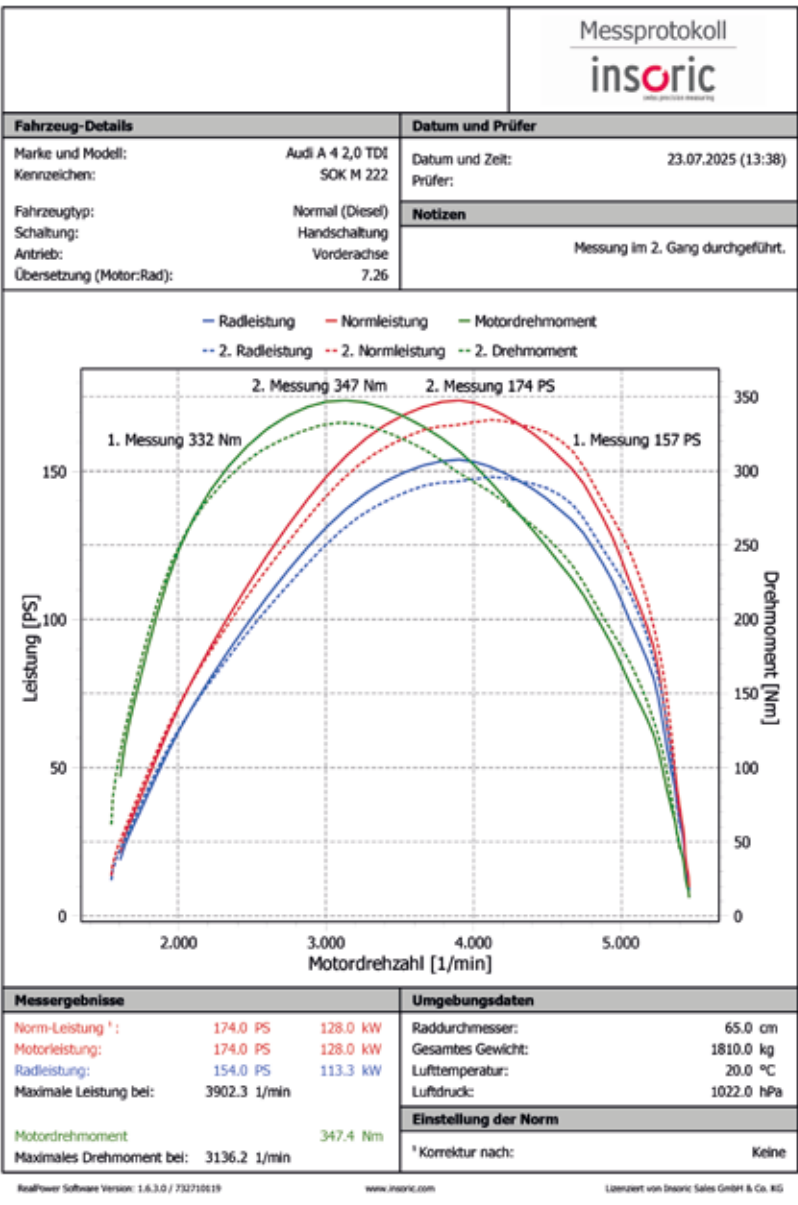

An innovative formula for maximum efficiency.

Provides a thorough clean and optimises the engine's performance.

THE BENEFITS AT A GLANCE

- Deep cleaning of the entire diesel system
- More power, optimised fuel consumption
- Protects the DPF and fuel injection system through significantly improved fuel injection
- Provides corrosion protection and prevents microbial growth

HIGHTEC INJECTOR CLEANER DIESEL (Art.-No.: 23012)

**More power.
Lower fuel
consumption.
A cleaner engine.**

Effectively cleans the entire fuel system and noticeably improves engine performance.

THE BENEFITS AT A GLANCE

- Cleaning the fuel injectors
- Greater performance and reliability
- Improved handling and smoother engine running

HIGHTEC DPF CLEAN AND PROTECT (Art.-No.: 23014)

**Improved
engine efficiency.**

Cleans and protects the diesel particulate filter (DPF) to ensure long-lasting engine performance.

THE BENEFITS AT A GLANCE

- Noticeably less soot
- Protection for the DPF – fewer repairs, more driving pleasure
- Optimised engine performance and improved cold starts
- Greater driving comfort from the very first use

HIGHTEC CETANE BOOSTER (Art.-No.: 23013)

**Performance,
efficiency and
reliability taken to
a whole new level.**

Optimises combustion and ensures an all-round improvement in driving performance.

THE BENEFITS AT A GLANCE

- Cetane number increased by up to 5 points
- Improved engine performance and greater driving comfort
- Reliable cold start

Engine oil additives

Innovation at the heart of the engine

Our highly effective engine oil additives enhance lubrication performance, reduce friction and prevent harmful deposits. They ensure long-lasting protection, the highest level of cleanliness and maximum efficiency – so that engines continue to operate reliably and powerfully even under extreme loads.

HIGHTEC ENGINE CLEANER (Art.-No.: 23021)

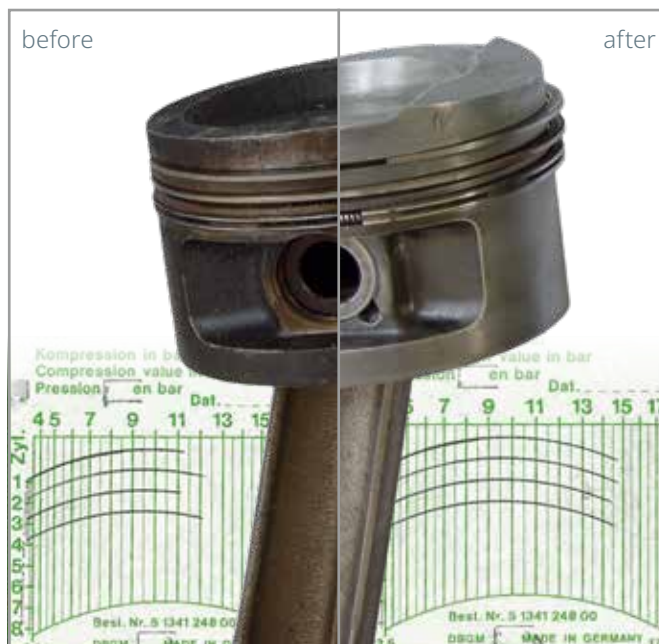

Revitalisation of contaminated drive systems.

Delivers noticeable improvements in performance, fuel consumption and engine running. Add to the old oil before every oil change.

THE BENEFITS AT A GLANCE

- Thorough cleaning of the oil circuit
- More power and smoother engine running
- Easy to use before an oil change

HIGHTEC OIL STOP LEAK (Art.-No.: 23022)

A highly effective short-term solution for oil leaks and seepage.

Restores hardened gaskets and effectively seals minor leaks in the engine, bearings and valve cover.

THE BENEFITS AT A GLANCE

- Effectively stops oil leaks
- Easy to use without having to visit a garage
- Prevents further damage and costly repairs
- Reduces mechanical abrasion and wear

A hand is shown holding a small, dark, cylindrical metal component, possibly a valve or a plug, near a car engine. The engine is partially visible, showing various hoses and mechanical parts. In the background, a radiator with a grid-like structure is visible. The entire image has a blue tint.

Coolant additives

Stability that protects and preserves

Our tried-and-tested coolant additives keep systems free from deposits, prevent corrosion and ensure consistent heat transfer. They provide robust protection for a wide variety of cooling systems – ensuring reliable engine performance and a longer service life for components.

HIGHTEC RADIATOR CLEANER (Art.-No.: 23031)

Powerful cooling system care for maximum performance and reliability.

Removes even stubborn deposits and restores the cooling system to full working order.

THE BENEFITS AT A GLANCE

- Cleans the entire cooling system
- Restores the function of key components
- Improves heating and cooling performance
- Increases operational reliability and service life

HIGHTEC RADIATOR STOP LEAK (Art.-No.: 23032)

The perfect immediate remedy for a coolant leak.

Quickly, reliably and permanently eliminates leaks in the cooling system.

THE BENEFITS AT A GLANCE

- Seals in no time at all
- Reliable protection against coolant loss
- Ensures the operational safety of all water-cooled systems
- Saves time and repair costs

Since 1995, ROWE has stood for high-quality lubricants and coolants made in Germany – with a clear mission: to turn our partners' ambitions into reality.

Our comprehensive product line, featuring a high degree of vertical integration, is available in more than 80 countries; numerous approvals from renowned manufacturers attest to the fact that ROWE products meet the highest standards. Our plant in Worms – one of the most modern in Europe – sets the standard for sustainability and quality.

But for us, premium products are just the beginning: From development and manufacturing to services that go beyond the product itself, we work every day to make your business more successful.

Always ambitious

As a value-added partner for the development, manufacture, and supply of lubricants and coolants, we enable our partners in the automotive and industrial sectors to make their businesses more successful. This is both our mission and our promise.
